Ahmedabad, Gujarat

PROFESSIONAL SUMMARY

Full Stack Developer with hands-on experience in building end-to-end web applications using Java, Spring Boot, React.js, Node.js, MySQL, and MongoDB. Skilled in frontend development, backend API integration, database design, authentication, role-based access control, and scalable CRUD-based applications. Adept at working across the full development lifecycle — from database design and backend logic to responsive UI development and deployment.

EDUCATION

B.Tech. in Computer Science & Engineering – CGPA: 8.85/10 (till Sem 7) GLS University, Specialization in AI/ML	2022 – Present Ahmedabad, Gujarat
Higher Secondary Certificate (HSC) – 70.76% P.B.D. Joshi Higher Secondary School (GSEB)	2022 Ahmedabad, Gujarat
Secondary School Certificate (SSC) – 81.5% Cadila Higher Secondary School (GSEB)	2020 Ahmedabad, Gujarat

EXPERIENCE

Java Full Stack Developer NextGenSoft Technologies LLP	Dec. 2025 – Present Ahmedabad, Gujarat
- Developed RaahSetu, a full-stack transit web application for Ahmedabad using React.js, Spring Boot, and MySQL. - Built responsive frontend modules and integrated backend REST APIs for authentication, route search, nearby stops, journey planning, and admin-side route/stop management.	

PROJECTS

Bus Booking System GitHub <i>React, Vite, Spring Boot, Java 8, MySQL</i>	Dec. 2025 – Feb. 2026
- Developed a full-stack Bus Booking System with modules for route search, seat booking, ticket viewing, and booking management. - Implemented REST APIs, Admin/Passenger role-based flows, and backend logic for seat availability validation, booking creation/cancellation, and route management.	
Collaborative Code Editor & Runner GitHub <i>MongoDB, Express, React, Node.js, Monaco Editor, Yjs, WebSockets, Socket.IO</i>	July 2025 – Aug. 2025
- Built a full-stack real-time collaborative code editor with React frontend, Node.js backend, and MongoDB-based room and session handling. - Implemented live multi-user editing using Yjs and Socket.IO, WebSocket-based code execution, and real-time stdin/stdout streaming.	
Gujarati Sign Language Interpreter GitHub <i>HTML, CSS, JavaScript, Node.js, MongoDB, Web Speech API</i>	June 2024 – May 2025
- Developed a responsive full-stack web application for speech/text-to-sign translation with Node.js backend and MongoDB for data persistence. - Integrated Web Speech API for real-time input processing and generated HamNoSys-based outputs to drive avatar-based sign rendering.	

CERTIFICATIONS
